With over 5 years of cross-industry experience, I've closely collaborated with designers, marketers, and analysts.

Dedicated to continuous learning, I strive to deliver *pixel-perfect* designs with a focus on **SEO** and **Performance** optimization, essential for maintaining a high *Quality Score* for websites.

I'm committed to the principles of 🌱 *Sustainable Software Engineering*: prioritizing best practices for clean code and resource optimization, both to minimize environmental impact and to smartly cut costs.

Additionally, I consider *Web Accessibility* a priority, ensuring an inclusive user experience by providing seamless access for individuals with disabilities.

LAST WORK EXPERIENCE

Growth Engineer at [Slang](#)

08/2022 - PRESENT [Boston, USA] [EdTech, B2B2C]

- ★ Established and tailored the Growth department to meet organizational needs, driving significant growth.
- ★ Enhanced technical skills through mentorship from the company's CTO, leading to the successful implementation of advanced project techniques.
- ★ Revamped over 20 Marketing pages, the company blog, and email structures, enhancing performance and user experience.
- ★ Installed and reconfigured analytics tools, improving data accuracy for better decision-making.
- ★ Led a workshop for non-tech team members, simplifying technical concepts and processes.
- ★ Boosted the website's SEO score from 70 to over 90, significantly increasing visibility.
- ★ Developed a Feature Request Guide for Marketing and Sales teams, streamlining project processes and enhancing efficiency.
- ★ Created integrated landing pages, reducing dependency on third-party tools, cutting costs, and improving analytics capabilities.
